

Be Smart. Stay Sharp. Stay Drug- Free!

Drug usage can be a danger to yourself and those around you. Think before you act, and make sure you have access to the proper resources near you.

Kansas State University 2026

Why Does It Matter?

Based on a 2025 Report from the University of Kansas, one in five Kansas adults meet the criteria for a substance abuse disorder. -KU

Drug misuse is closely linked to anxiety, depression, and suicide risk; awareness promotes early help-seeking.- CDC

The earlier someone starts using drugs, the higher their risk of addiction later in life. - SAMHSA

Kids' brains are still growing, so drugs can affect memory, learning, and impulse control long-term.- NIDA

You Can Control It!

Know Your Resources

Be aware of available services: community, state, and nation wide to connect with support services for yourself or loved ones.

Phone A Loved One

If struggling with addiction call a trusted adult, aquantence, or emergency service for support.

Stay Sharp, Be Smart

Remember the real-life consequences of drug use and addiction.
