

Lesson 9: Your Future

Reflecting on career goals

 In this activity, you will reflect on the qualities needed for your dream career and understand how healthy life choices help you reach your goals.

Welcome to Career Planning

Choosing a career path is an exciting step toward your future. Success in any profession relies on specific personal qualities and consistent, healthy decision-making. By understanding what matters in a workplace today, you can better prepare for the path ahead.

Term	Definition
Responsibility	A state of being accountable for your actions. It means doing what you say you will do.
Reliability	The quality of being trustworthy. Others know they can count on you to complete tasks.
Communication	The ability to share information clearly. It involves listening well and speaking with purpose.
Decision-making	The process of choosing between options. Good choices lead to positive outcomes.

Read the Career Insight

Read the passage below carefully. As you read, ask yourself: How do personal habits and choices influence the way someone performs at work?

Your future career will require more than just technical skills. Employers look for character and consistency. When you commit to a job, you are agreeing to show up ready, focused, and safe. This means making choices that keep your mind and body healthy every day.

Unhealthy choices, such as using substances like drugs or alcohol, can disrupt your ability to remain reliable. They affect your brain, making it harder to communicate clearly or handle emergencies safely. When these qualities are weakened, your career goals become much harder to achieve.

Building a strong foundation starts now. By valuing safety and clear decision-making in your daily life, you are training yourself to be the type of person who succeeds in any professional environment.

Building Connections

Connect the ideas from the text to your own understanding by filling out the table below.

Key Concept	Your Understanding	Why is this important?
Responsibility	<i>Being in charge of my tasks.</i>	<i>So others can trust me.</i>
Substance use	Write your answer here	Write your answer here
Clear communication		
+ Add a row or column as needed		

Try it out

Use what you have learned to answer the following scenario-based questions.

Scenario: Imagine you are starting a job. How does substance use prevent you from showing reliability?	Write your answer here
How does a person's ability to make safe decisions affect their teammates?	
If you are struggling with a choice, who can you talk to for support?	

Show what you learned

Create a digital poster to show what you have learned. Use Magic Media or Elements to help visualise or record your idea.

- **Step 1:** Select the career you are interested in.
- **Step 2:** List three qualities from our table that are vital for that career.
- **Step 3:** Write a short sentence explaining how staying healthy helps you keep those qualities.
- **Step 4:** Add images that represent your chosen career and these positive traits.

Reflect on your learning

Reflect on the work you have completed by answering these questions.

Explain one way substance use can negatively impact a person's communication skills at work.

[Write your answer here.]

What was the most important thing you learned about how your personal choices affect your future career?

Which quality—responsibility, reliability, safety, or decision-making—do you want to focus on improving this week?
